---

**Jordan Jones** is a Solutions Architect at AWS. He is a trusted technical advisor for customers, working to bridge the gap between complex business problems and technical solutions. He helps enterprise customers throughout the life of their AWS cloud adoption journey. He is currently focused on delivering enterprise level solutions within the fast moving domains of Generative AI and Security. Jordan brings a rare interdisciplinary perspective that blends technical skill, government experience, and responsible technology use.

### **Who Does Jordan Speak to?**

Jordan speaks to enterprise customers, c-suite executives, technical professionals, and students, translating complex technical topics and solutions into accessible, actionable insights, while maintaining the appropriate nuance and depth.

### **Where has Jordan Spoken?**

Jordan has delivered talks in a variety of settings, to include AWS Re:Invent, Techsgiving Conference, GovTechCon conference, Machine Learning University academic symposium, Psi Nu Chapter of Omega Psi Phi Fraternity, Inc. seminar, George Mason University, Boys and Girls Club of Greater Washington, DC, and various technical panels across disciplines.

### **Speaking Focus**

Jordan is known for delivering high-impact technical workshops, tech talks, and engaging in panel discussions that resonate across disciplines.
